PROJECTS

• Collaborative Task Management System

Developed a task management app for team collaboration with features like task categorization and real-time updates.

[GitHub](#)

• Amazon Price Tracker System

Compares prices on Amazon and sends notifications when prices drop. [GitHub](#)

• Job Portal Using DSA Concepts

Uses Java, MySQL, HTML, and CSS for job search and matching with optimized algorithms. [GitHub](#)

• Airline Reservation System

Streamlines flight booking with search, seat reservation, and online payments. [GitHub](#)

• LPG Leakage Detection Using IoT

Developed a system to detect LPG leakage using IoT technology, incorporating sensors to monitor gas levels and trigger alarms for safety. [GitHub](#)

PASSION AND FUTURE GOALS

- Passionate about leveraging technology to solve real-world problems and drive innovation. Looking forward to contributing to cutting-edge projects in the tech industry and continuously improving my skills. My goal is to work in a dynamic environment where I can learn, grow, and make a significant impact through technology.
